Three-planet system holds clues to atmospheres of Earth-size worlds

Extrasolar planets are being discovered by the hundreds, but are any of these newfound worlds really like Earth? A planetary system recently discovered by the Kepler spacecraft will help resolve this question, according to Institute for Astronomy experts.

Is Zumba on your resolution list? What you 'knee-d' to know

One of the first medical studies to examine injuries associated with Zumba classes in Hawai'i indicates you should watch your knees. The knees were the most common injury in the survey of people taking Zumba exercise classes from five different instructors, conducted by the John A. Burns School of Medicine.

Wang honored with American Meteorological Society's highest award

UH Mānoa's Bin Wang, professor and former chair of the Department of Atmospheric Sciences, was awarded the 2015 Carl-Gustaf Rossby Research Medal by the American Meteorological Society "for creative insights leading to important advances in the understanding of tropical and monsoonal processes and their predictability."

Archaeological evidence for ancient voyaging in French Polynesia

In the inaugural public lecture of the Oceania Ensemble initiative, UH Mānoa archaeologist **Barry Rolett** will give a first-hand account of recent discoveries, based on work in the Marquesas and Austral Islands and his collaboration with UHM geologist **John Sinton**.
